# rECO

## Microfibre cloth

Resource-saving microfibre cloth. Dimensionally stable and durable with tear-resistant overlock stitching.

### Spezifikation

- Size: 40 x 40 cm
- Material: 88% rPES 12% PA
- Weight: 260 g/m<sup>2</sup>
- Color:
  - 682540/42527 rose
  - 682990/42528 blue
  - 684330/42529 yellow
  - 684700/42530 green
- PU: 20/10

### • Benefits

Environmentally friendly, as it conserves resources! Consists of 88% recycled polyester fibres. This reduces the need for fossil raw materials. Contemporary upcycling.

### • What is rPES?

rPES is recycled polyester granulate obtained from PCW (post-consumer waste), usually in the form of PET bottles.

### • Properties

Durable and dimensionally stable due to the tear-resistant overlock stitching. The towelling structure ensures excellent dirt absorption.
